

Our goal is to catch the children who are falling through the cracks.

Using our total team approach, we are able to accomplish this by...

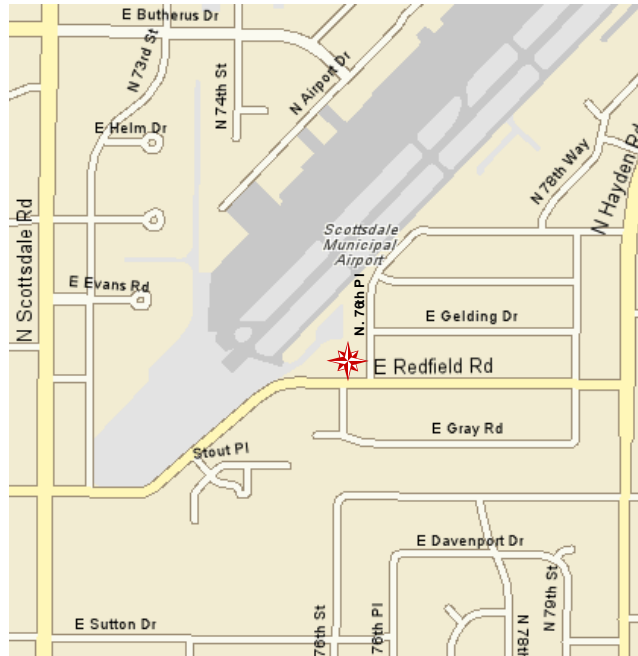

- * Providing a structured learning experience through one-to-one and small group instruction
- * Fostering a positive self-concept
- * Creating life-long learners

Steps To Success Learning Center...

Making a difference one life at a time.

Who needs Steps To Success Learning Center?

- * Children who are falling through the cracks
- * Children who call themselves dumb or stupid
- * Children who are behind in school
- * Children who don't qualify for special help at school
- * Children who have mild to severe reading difficulties
- * Children with different learning styles
- * Children with attentional difficulties
- * Children with low self-esteem
- * Children with social delays
- * Children in need of skill building
- * Children in need of subject specific tutoring

According to a Newsweek poll, "...42% of Americans believe there is a great need for children to receive private, outside tutoring." **Steps To Success Learning Center's** team oriented approach addresses the needs of children who are falling through the cracks.

We're more than just a tutoring center.

As a team we reach the whole child.

Using customized programs designed for each individual child, the Steps to Success method can include:

- * Strategies for ADD/ADHD
- * Organizational/time management training
- * Motivation/empowerment
- * Team building/leadership development
- * Subject specific tutoring/homework support
- * Study skills
- * Self-directed, life-long learning
- * Responsibility/independence
- * The highly-structured, concept-based **Orton-Gillingham Reading and Language Program** which includes reading decoding and comprehension, spelling, composition, vocabulary development, and grammar and usage
- * **Personalized home school services** available full or part-time, using the student's natural learning styles

The Lindamood-Bell™ Reading Program

Does your student do any of the following while reading?

- * Guess at words, reading boy for ball
- * Add, omit, or switch sounds such as was for saw
- * Forget how to spell words from day to day
- * Re-read just to make sense of what's read
- * Struggle to answer questions about reading material

If your student is not responding to traditional classroom methods, he or she needs to be taught differently. We're highly effective because we use the **Lindamood-Bell™** intensive, hands-on, multi-sensory approach to reading. Students typically improve by one to two years after 40 hours of intensive one-to-one therapy.

"One program that has been proved effective is the Lindamood-Bell Phoneme Sequencing™ program (LIPS™), which makes students identify how sounds feel while saying them."

~Newsweek, November 22, 1999, "Dyslexia and the New Science of Reading."
